

② 中高 英語科 解答用紙

[8]

"Practice makes perfect" is a phrase commonly used to encourage those who are struggling with a certain skill or activity. The phrase emphasizes the value of effort.

Although the word "perfect" is used in this phrase, in my opinion achieving perfection is not the main goal. What is important is for one to practice and improve, maybe one day even surpassing perfection.

If given the opportunity, please use this phrase to encourage someone struggling with something to make them feel good about themselves.
