Preparatory Survey on Water Supply and Sewerage System Project in Phu Quoc Island, Vietnam

JICA PPP Feasibility Study (September 2011-July 2013)

◆ Objective of the Project
Phu Quoc will be developed into a tourist resort and the population is expected to increase substantially. It is expected that private funds would be needed for the massive infrastructure investments because the government budget is rather limited. Therefore the water supply and sewerage systems in Phu Quoc will be developed as a public private partnership.

◆ Activities and Achievements
Kien Giang province reviewed the final report submitted in July 2013. Kobe Team (Kobelco Eco-Solutions Co., Ltd., Nihon Suido Consultants Co., Ltd., Kobe City) and Kien Giang province People's Committee held a meeting to discuss a framework for a public-private partnership (PPP), funding for construction and operation, etc.

◆ Future Activity Plan
Kobe City will continue to have discussions with Kien Giang province People's Committee to launch sewage works with considering PPP feasibility study conducted on Phu Quoc Island in Kien Giang province.

Memorandum of understanding on technical cooperation and exchanges related to water and sewerage works with Kien Giang province

Kobe City and Kien Giang province signed a memorandum of understanding in July 2011 on personnel and technical exchanges for water and sewerage works as well as technical cooperation for improving other water environments.

Conclusion of a Memorandum of Understanding (Kien Giang Province, Vietnam)
